E-108U

**12 Position LED Electronic Lucky Rotary Board Kit
For Arduino UNO R3**

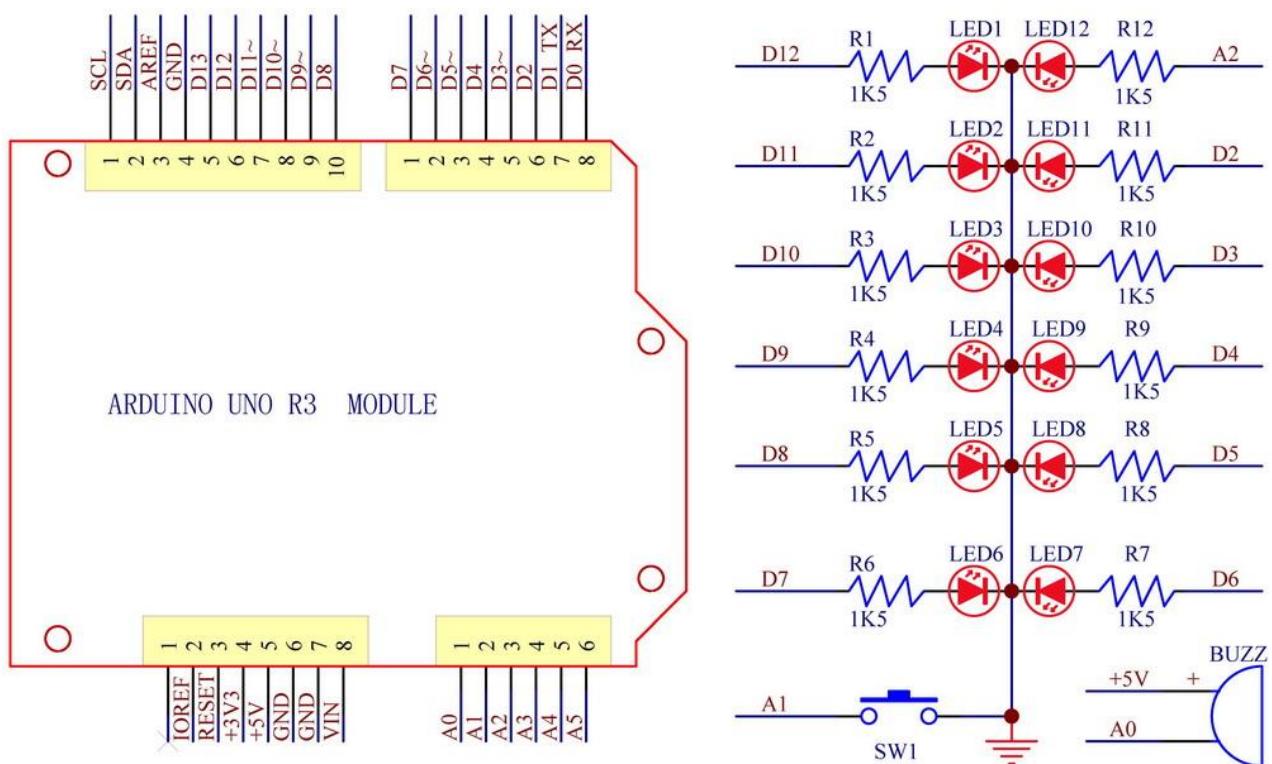

This is an intuitive, simple and inexpensive circuit kit, both exercise your soldering skills, also profound learning Arduino program, will attract and enhance students' interest in learning.

The item unassembled, you must soldering and assembly, and the item not include Arduino UNO R3.

PCB diameter: 88mm / 3.46 inch

Youtube video link: <https://youtu.be/GXj6HNA7U8Q>

Schematic:

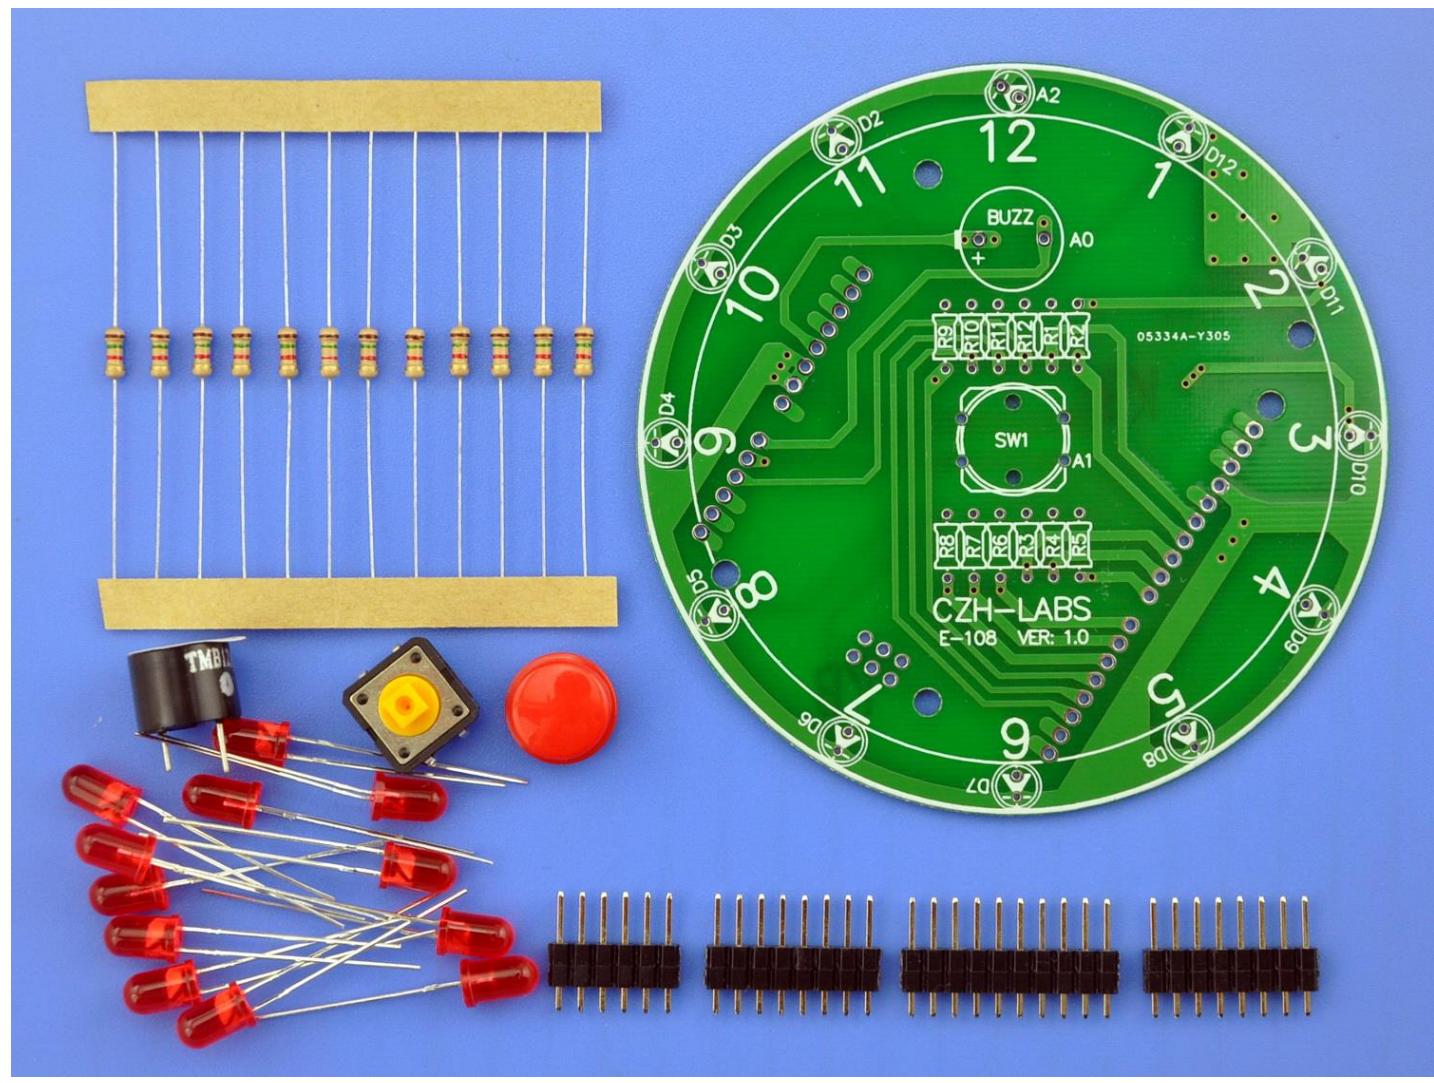

Bill of Material

Parts	Description	Position	Quantity	Note
Pin header	10 + 8 + 8 + 6 pins	Bottom layer	32 pins	
Resistor 1.5K ohm	Carbon film 5%, 1/4W	R1~R12	12	
Buzzer	Active buzzer	BUZZ	1	TMB12A05
LED	D=5mm	1~12	12	Red
Button switch	12*12mm	SW1	1	OMRON BF3
Button knob	D=12mm	SW1	1	Red
PCB	CZH-LABS E-108 VER:1.0		1	

Note:

LED and Buzzer watch the polarity.
Pin headers mount to PCB bottom surface.

Example source code for Arduino UNO R3

```
